

# Blueproof™

buys time, saves lives

## Inspired by the tragic deaths of six children who died in a house fire in the UK in 2012

BLUERAD was formed in 2013 with expert engineers drawn from all corners the world. Their aim was to bring to market an innovative fire protection device that would add to the protection of your home, office and working environment and protect your life and the lives of your children and loved ones. Blueproof™ is this unique and innovative device.

For technical details kindly download the Blueproof™ Technical Brochure from our website [Bluerad.co.uk](http://Bluerad.co.uk)

**If you cannot use this flyer kindly pass it on to someone you care for who can.**

The most inexpensive active fire protection system in the world Blueproof™ has no moving parts or power requirements, maintenance free and providing constant protection to your home 24/7/365.

Each Blueproof™ you fit self-targets the fire. It lowers temperatures throughout the building, reducing killer smoke and allowing extra time to escape.

Blueproof™ can easily be fitted, in minutes, even without technical knowledge. Blueproof™ will help protect life and property against fire, whether the building is single occupancy or a high-rise block, not easily accessed by emergency vehicles.

Some fire alarms activate when children and the elderly may already be overcome by smoke, our biggest killer. Many deaths occur in homes even though alarms are fitted. Complete your safety enhancement for very little outlay with Blueproof™ your risk is reduced significantly.

If you have the vision to transform your home, but are put off by the exorbitant cost of fitting current systems, fit Blueproof™ now. Landlords can reduce the risk to people from fire as per the Fire Risk Assessment requirements.

**Available in stores soon or get them now from [www. Bluerad.co.uk](http://www.Bluerad.co.uk) or Amazon**

# Blueproof™

fire protection for the safety of your home

buys  
time  
saves  
lives

- Self-targets fire
- Targets and reduces smoke
- Distributes water from your radiator when and where it is needed most
- Quick and easy to fit
- Best quality and lowest cost on the market

[www.blueproof.co.uk](http://www.blueproof.co.uk)

# buys time

# saves lives

Blueproof™ has been proven to provide that extra time needed to improve your chances of survival when a fire occurs. It requires no maintenance and provides constant protection even when the radiator is turned off. It will fit into all homes with or without central heating. It can be attached directly to the water supply pipe work.

Fact: Results from full scale fire testing prove that Blueproof™ can:

- cool your whole house down. Temperatures fall substantially.
- allow you to breathe. It stabilises oxygen consumption by the fire and reduces smoke particles.
- suppress the fire within the first minutes of it breaking out.
- provide water where and when it is needed the most. It delivers the water directly to the fire and as the fire moves self-targets.
- work before the fire brigade even receive a call.
- reduce water damage compared to sprinkler systems.
- penetrate the smoke layer, unlike fine mist systems.

## Technical Specs

**Flow rate:** Variable / Activation by abnormal air temperature

**Protected area:** proportional to heating panel requirement / room volume

**Run time:** until mains is isolated or whole system is spent

**Installation requirements:** Reliable water supply

Blueproof

## Q&A

### What is Blueproof™?

Blueproof™ is an injection moulded high-tech co-polymer device that doubles as a vent plug. Combined with an array of heat detecting areas that self-target the heat source, it opens and propels the fluid in your radiator directly at a fire. As the fire moves it follows the movement.

### Will it fit my radiator?

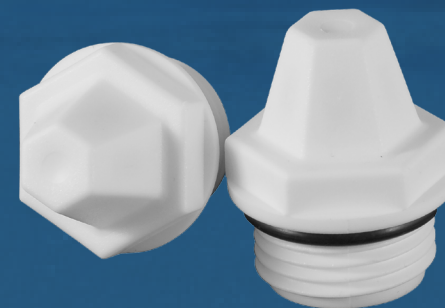

YES. Blueproof™ fits all radiators containing water with standard thread or similar.

### Can I fit it?

Yes, you will need to isolate the radiator, remove your existing vent plug and replace with Blueproof™. Fit, open valves, vent, tighten and it's working.

### Will it work with my Central Heating system?

Yes, Blueproof™ works with all Central Heating systems that contain water as the heating medium.
